DEADLINE

October 26,2018

As the state's gateway to Colorado River resources, a critical operational hub for the State Water Project, and a leader in groundwater management and "new water" development, Region 9 will take a deep dive into the water reliability issues we face now and into the future. We'll delve into the projects, laws, agreements and partnerships that have facilitated economic growth and stability in the region, while discussing possible obstacles to this forward trajectory. Most importantly, this event will showcase the region's top water leaders collaboratively exploring the future of innovative partnerships, policies, infrastructure and agreements that will enhance our water reliability for generations to come.
